Art project "Holland"

"In 2016 and 2017 we took photos and video shoots in the port of Rotterdam and around, in the South and North Holland.

This is a project about the future.

We see that the future world will be similar to Holland today.

Already now, Holland shows the whole world how to exist in the struggle and cooperation with the changing climate and new problems of civilization.

There should not be a war of all against all, wars with each other, humanity should not spend its resources on new weapons - humanity must spend its resources on building the future now, today. In the future, problems will not disappear.

The new world, the world of the future, is the continuation of the Biblical story.

The story of Cain and Abel remains. The history of the Flood is always close.

We continued our work in Nieuw en Meer in September 1 - October 31 2018.

We made portraits for our project. These are portraits of people who create Holland, who have become part of the landscape of Holland. They are a landscape of Holland. They are Holland.

The work is not finished. We will continue to work in our Moscow studio, using photos and videos made here in studio Nieuw en Meer. The project will be presented at the exhibition of Vladimir and Maya in October 19 - November 10, 2019 in Pulchri Studio."
